Internet Programming – SECJ 3303
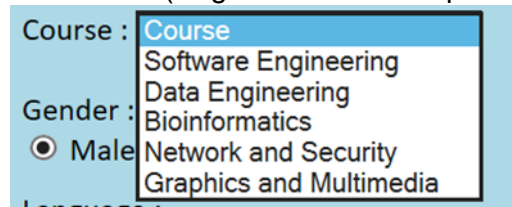

Lab Exercise 1

Objective: To create a request form and display the response page using Servlet.

You have to create a form as in Figure 1 and provide the display of the input data for the response page.

The important elements that you should include are:

- TextField element
- Email element
- TextArea element
- Combo Box (single item selection permitted) – Dropdown

- List Box (multiple items selection permitted)
- Radio Buttons (single item selection permitted)
- Check Box (multiple items selection permitted)
- Push Button – Register Button
